The parties amend the subrecipient agreements for Drive AM, Hybrid Phase 2 and Last Tactical Mile to settle 2025 indirect cost on an actual indirect rate in place of the de minimis basis elected under each agreement. The restated column applies indirect combined at 24.71% to modified total direct cost, with fringe at 21.90% of the payroll register.

THE RATE BELOW HAS BEEN SUPERSEDED
These positions were measured on an indirect combined rate of 24.71%, which the record now carries as superseded. Recompute before issuing.

AWARD	BILLED 2025	RESTATED	TO RETURN	TO CLAIM
Drive AM AM-DRIVE-AM · 12 invoices	579,240.87	450,766.64	128,474.23	—
Hybrid Phase 2 AM-HYBRID-P2 · 9 invoices	187,416.05	114,468.98	72,947.07	—
Last Tactical Mile AM-LTM-PROJ88 · 12 invoices	368,222.24	412,182.84	—	43,960.60
All 3 projects	1,134,879.16	977,418.46	201,421.30	43,960.60

NET DIFFERENCE, AND ITS TREATMENT

The two columns above are not netted in either party's records: 201,421.30 over-collected and 43,960.60 under-recovered are separate findings and each stands on its own award. For settlement only, the parties note a net difference of 157,460.70 across all 3 projects.

Mutual waiver

The parties agree that the net difference of 157,460.70 arising across these 3 projects shall be treated as unrecoverable by either party for 2025. No invoice, credit, refund or claim shall be issued by either party in respect of it, and neither party waives any position on any other period.

No change-of-basis clause is on the record for Drive AM; NCDMM is asked to name the instrument under which this amendment is incorporated for that award.

NOT CERTIFIED — nobody has put their name to the rate these figures rest on. The rate has been recomputed since it was certified, so the signature is on a build-up that no longer stands. Sign the new one. Nothing here is blocked by that: this is a working document, and it says so rather than waiting.
