As billed, line by line			143,130.40	0.00
THE POSITION			0.00	128,474.23

The two money columns are deliberately not added together. One is money YBI is asking for and the other is money YBI is giving back; a net figure would settle both in one line and say nothing about either.

The two rows are different readings and are not meant to add to each other. Line by line compares the indirect line on the face of each invoice against what the rate supports on that invoice's own base. **THE POSITION** is the whole objective rebuilt against the cost record — what the year supports against what was actually billed — and it is the only figure this form asks NCDMM to accept. Where indirect was recovered inside a loaded labour rate no invoice carries an indirect line at all, so the line-by-line reading shows recovery forgone that the rebuild then finds was collected.
