As billed, line by line			98,049.41	0.00
THE POSITION			107,683.52	0.00

The two money columns are deliberately not added together. One is money YBI is asking for and the other is money YBI is giving back; a net figure would settle both in one line and say nothing about either.

The two rows are different readings and are not meant to add to each other. Line by line compares the indirect line on the face of each invoice against what the rate supports on that invoice's own base. THE POSITION is the whole objective rebuilt against the cost record — what the year supports against what was actually billed — and it is the only figure this form asks NCDMM to accept. Where indirect was recovered inside a loaded labour rate no invoice carries an indirect line at all, so the line-by-line reading shows recovery forgone that the rebuild then finds was collected.

WHAT IS NOT FINISHED

- Every cost judged — Every group carries a position. 757 of 757 are working positions a script proposed and nobody has adopted — classified, and not yet a judgment.
- Every square foot accounted for — Needs the square footage per building, and what each part is used for. Until it lands the 200.465 carve-out cannot be computed at all, and every dollar of tenant and vacant occupancy cost sits in the federal pool.
- Return one signed copy to the address above. YBI records the acceptance against the modification named.
- Every asset's funding source — 0.0% of the asset cost carries a funding source, so 200.436(b) cannot be answered on the depreciation the rest of it holds. It is the one column the schedule does not carry and 200.313(d)(1) requires.
- The paper behind the judgments — 0 of 363 federally chargeable judgments cite a document, of 757 live. Attaching is not citing: a
