

Discrepancies to settle

Youngstown Business Incubator · 2025 cost allocation · for Tom Metzinger · figures as at 11 September 2026

19 items, each found by a control rather than by somebody reading, and each answerable from what you already know or can reach this week. Ordered by how much each moves the rate — the six depreciation items are worth roughly three points of the indirect rate between them. Tick a status, write what you found. **Leave anything unsettled blank:** we record an empty box as unanswered and come back to it.

Example

0	The Bacon \$45,000 — confirmed	45,000.00
A pledge from Vince and Phyllis Bacon to fund interns was booked as a credit against 5142 Intern Wages rather than as contributions income. Ten of the eleven cross-reference controls were blind to it; only the payroll register could see it. Confirmed on 11 September 2026. Still open: the entry has not been reposted in QuickBooks. When it is, tell us — the reconciling item has to come off with it, and the two must not both be there. <i>Fringe rate: 22.45% against the defensible 21.90%.</i> ☒ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE Confirmed 11 Sep 2026. QuickBooks entry still to be reposted. — Tom Metzinger, 11 September 2026 Answered by Date		

Depreciation

1.1	Three reimbursements netted against Tech Block Building 5	157,739.00
The 2026 asset schedule carries Fitz Reimbursement –117,739.00 (30 Jun 2019), NCDMM Reimbursement –25,000.00 (26 Sep 2019) and YSU Reimbursement –15,000.00 (31 Dec 2019) against Building 5. This is Finding 2024-001 in the flesh. Is the recorded cost of Building 5 gross or net of these three? And is NCDMM's \$25,000 federal money? <i>If the cost is net, the gross basis is understated and the federal share cannot be derived from the books at all.</i> ☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE Answered by Date		

1.2	Two aggregates the register's own totals exclude	1,516,695.00
BUILDINGS at 180,000.00 and CAPITAL IMPROVEMENTS at 1,336,695.00 are printed on their sheets and left out of the Total Cost/Basis those sheets carry. They look like opening aggregates the itemised rows below them replaced. Confirm these were superseded by the detail rather than dropped by accident. <i>Reading them as assets overstates the basis by \$1.5m; dropping them silently is a \$1.5m hole nobody could see.</i> ☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE Answered by Date		

1.3 The register is above the balance sheet

122,921.14

Register 23,419,573.64 plus construction in progress 438,355.19 = 23,857,928.83, against gross fixed assets of 23,735,007.69 on the 31 December 2025 balance sheet.

Can we have the register as at 31 December 2025? Failing that, confirm the 122,921.14 is 2026 additions.

The register is a 2026 export, so this is probably timing — and the rate should not rest on 'probably'.

Answered by

Date

1.4 Depreciation differs

22,429.02

2025 P&L account 5010 reads 850,382.89. The register's Current Depreciation totals 872,811.91.

Same likely cause as 1.3 — a 2026 export — and the same answer settles both.

The depreciation figure feeds the facilities pool directly.

1.5 Xjet Ceramic Printer carried at zero

0.00

System no. 174, in service 25 January 2018, seven-year life, cost 0.00, no accumulated and no current depreciation. A real number and a real date with no money against them. There is also an XJET cost objective on the record.

Donated? Fully reimbursed and netted, like 1.1? Or written off?

An asset at zero that should carry cost is missing basis.

☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE

Answered by

Date

1.6 Two True Up Entry rows

16,931.13

On the Building 5 sheet, dated 30 and 31 December 2019, carrying accumulated depreciation of 7,173.29 and 9,757.84 and no cost at all.

What were these correcting?

Accumulated depreciation with no asset behind it distorts net book value by class.

The books

2.1 Every ledger-to-P&L difference is Rising Tides

7,469.87

Five accounts differ and all five are one account bleeding into four others: Rising Tides +7,469.87 against ESP -6,300.00, Travel -622.26, Advertising -280.40 and Staff Training -267.21. Ten specific lines, all named on the record.

Were these reclassified out of Rising Tides after the general ledger was exported and before the P&L was?

If yes the record is right as it stands. If not, one of the two exports is wrong.

☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE

Answered by

Date

2.2 Is Rising Tides federally funded?

1,386,355.56

The objective master says not federal. The controller's workbook says it is. 137 ledger lines.

Which is right, and what is the award?

Changes the SEFA and the scope of the Single Audit — not just a rate. The biggest open question outside depreciation.

Answered by

Date

2.3 4801 IH Grant Income

451,170.39

The P&L reports it under Innovation Hub. The revenue ledger attributes it to NCDMM.

Which?

If it is not America Makes money, the America Makes reconciliation changes by nearly half a million dollars.

☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE

Answered by

Date

2.4 Hybrid is out by a hundred dollars

100.02

P&L revenue 3900 Grant Income:Hybrid Energy reads 191,638.05. The grant tabs read 191,738.17.

Which is right?

Small, and Hybrid's over-billing conclusion stands either way — but worth closing rather than leaving in a workpaper.

Date

Space

3.1 Four buildings named once each

4 buildings

The 2025 lease book names AM, Taft, Semple and Taft/semple once each. The other twenty-two tenants are in YBI or TBB5.

Are these YBI buildings, and are Taft, Semple and Taft/semple two buildings or three?

Square footage per building is what sizes the facilities carve-out.

☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE

Answered by

Date

3.2 One tenant across two buildings

1 tenancy

Taft/semple is a single row in the lease book.

Which building does it belong to, or how should the square footage split between the two?

A tenancy in no building cannot be carved out of the pool.

☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE

Answered by

Date

3.3 Eight tenancies with no start date

18,592.56

Azanna Elise, Equipment Appraisal Services, Greg Babinack, JSO Technologies, M. Jones, Made by Morgan, Parallax and Ralph Zerberonia say 'monthly' where a start date belongs.

Month-to-month arrangements, or start dates that were never recorded?

A suite occupied for part of the year is a part of a suite of cost.

☐ CONFIRMED ☐ CORRECTED ☐ STILL CHECKING ☐ SOMEBODY ELSE HAS TO ANSWER ☐ NOT APPLICABLE

Answered by

Date

3.4 MVMC starts 1 April 2026

1 lease

It is in the 2025 lease book and contributes no 2025 rent.

Should it be in the 2025 book at all?

A future tenancy counted as 2025 space overstates occupied area.

People

4.1

The payroll register keys people by surname

43 people

EWING, RUBY, GAFFNEY. The register carries surnames and no payroll identifier.

Any duplicate surnames on the 2025 register?

If yes, two people's hours are already joined together and every effort figure for both is wrong. It would be a change to the ingest, not to a form.

Invoices

5.1

The invoice dates on file are ours, not YBI's

3 invoices

10018, 10023 and 10039 all carry 2026-05-01 with an April 2026 service period, sitting in period 2025. Those dates are a placeholder in our loader — the line items and totals are real, the dates were never supplied.

The real invoice dates and service periods for the three.

A restatement is measured per invoice within a period, so a wrong date puts a claim in the wrong year.

☐ CONFIRMED☐ CORRECTED☐ STILL CHECKING☐ SOMEBODY ELSE HAS TO ANSWER☐ NOT APPLICABLE

Answered by

Date

5.2

No cash recorded against any invoice

57,961.42

37,593.90 + 1,374.00 + 18,993.52 issued, and zero receipts on the record.

Have these been paid, in whole or in part?

Collections are unknowable from the system today. A receipt may be negative, so a clawback would show here too.

Answered by

Date

5.3 The full invoice register does not exist

4 objectives

The system holds three invoices — 10018, 10023 and 10039, 57,961.42 between them. The 2025 ledger recognises America Makes revenue on four objectives: Drive AM 579,240.87, Digital Engineering 579,074.25, Last Tactical Mile 368,222.24 and Hybrid 191,638.05 — 1,718,175.41 in all.

Every invoice issued to NCDMM in 2025, across all four objectives.

A restatement is measured per invoice. With three on file the exercise can be demonstrated and not completed, and invoiced against recognised cannot be reconciled at all.

The narrative version, with the working behind every figure, is docs/FOR_TOM_TO_VERIFY.md. Not on this list and not yours to settle: the Drive AM cost-share contradiction (counsel), the \$617,065 of untracked cost share (partner evidence), asset funding source and square footage (those are the request workbooks), and the three untranscribed award budgets (ours).
